SALE CATALOGUE DISCLAIMER: All reasonable care has been taken by the vendor and designer to ensure that the information provided in this catalogue is correct at the time of publication. However, neither the vendor, selling agents and designer make no other representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information included in the catalogue.

WELCOME TO MAYURA

Dear Wagyu Breeders,

The de Bruin family and our excellent team at Mayura are incredibly pleased with this year's line up of quality high performance Wagyu cattle. The animals on offer are a step up in quality, both in phenotype and genetic potential. Also included in this year's offering are cattle bred to enhance growth and maternal traits, providing an important rotation for businesses that have invested in the Mayura breeding program.

This year's sale will be held entirely online, using the Elite Auctions platform.

To assist with animal selection, we will be providing high quality videos of the sale animals allowing for a virtual inspection through our website. To provide further confidence for our clients we have included independent structural assessment from industry experts. GDL Livestock is our agent for the Auction.

Cattle will be available for inspection on March 30th.

Performance breeding from a herd bred under commercial conditions focused on producing the highest quality Full-blood Wagyu Beef.

All animals at Mayura Station must flourish under commercial conditions, fertility is of utmost importance in our operation and females that don't produce a calf are culled from the operation. Running two distinct breeding herds, spring and autumn, we join our cows each year through fixed time AI and a 6 week cycle to back-up (herd) bulls. Replacement females are selected from proven females and must meet strict weight for age parameters to enter the breeding herd.

Our selection pressure is the key to improve profitability.

Selection of sale cattle is based on 3 main factors: phenotype, proven carcass performance and genomic analysis. Mayura Station has been performance breeding for over 20 years, with information from our branded boxed beef program's chiller assessment data feeding directly back into our breeding decisions. With over 10,000 carcasses analysed from 3,500 breeding females, the Mayura program can provide confidence that you are purchasing TRUE PERFORMANCE PROVEN cattle.

A high marbling early maturing herd

All animals have been fertility tested and have been vaccinated with 5in1 for males, 7in1 for females, a full drench history is available, all pestivirus vaccinated (also pesti-notched to confirm PI free status). A pre-screening for admission to Export Semen and Embryo Transfer collection centres has been completed. All yearling animals have been halter trained and only animals with a quiet disposition have been offered for sale.

All the best for 2022 from the Mayura Team

MAYURA STATION BREEDING PROGRAM

Our Goal

The aim of our program has been to produce Fullblood Wagyu cattle that are profitable. We continue to develop our Wagyu cattle through performance breeding. Selecting our key replacement breeding cattle directly from progeny testing and carcass data. Our cattle are also selected for fertility, growth and efficiency traits. As a result, our breeding herd are now large framed and early maturing. Our progeny are able to produce heavily marbled carcasses, with large EMA and HSCW at 24-26months of age, average days on feed is 270 days which is well below most other programs and leads to greater profitability.

Our program

The nature of the Mayura Station's vertically integrated business model means we are able to collect a significant amount of performance data for analysis from our breeding program. The transition from Microsatellite to 50K SNP testing on our entire herd has also enabled the production of genomically enhanced EBV's.

Each year our progeny are produced via an Artificial Insemination (AI) program and backed up by Mayura bred herd bulls. Each year we include new AI sires with our proven sires in the breeding program to diversify the gene pool and to determine the genetic merit of new Sires.

Our Herd bulls are produced via Embryo Transfer (ET) from females that are determined to be in the top 1% of our herd for carcass quality, from either carcass data or genomically enhanced EBV's. Performance recording begins with birth weights,

followed by consistent weaning at 5 months of age regardless of season.

Calves are kept in their contemporary groups and enter a structured backgrounding program through to feedlot induction. Upon entering the feedlot cattle stay in their contemporary groups and are fed for 270 days without exception. During this period from weaning, cattle are weighed every two months.

All cattle are processed at G & K O'Connor's and independently graded by an Ausmeat assessor. In addition to Ausmeat both the reflective MIJ Digital Camera and the latest MIJ30 Digital Camera have been used to digitally assess carcasses for Marbling %, Digital Marble Score, Marbling fineness and Eye Muscle Area. These important traits have been independently analysed by AWA BREEDPLAN and form the basis of the EBV's for our livestock.

As a result of performance breeding and genetic selection performance, has continued to improve over the five year average;

1. Increased HSCW by 5%
2. Increased EMA at 10/11th rib by 6%
3. Increased Ave Marble Score by 21%
4. Decreased Age at slaughter to 26 months
5. Reduced DOF to 270

HOW TO REGISTER with ELITE LIVESTOCK AUCTIONS

Welcome to the new age of selling livestock in Australia and "Happy Bidding"

- 1 Simply go to www.elitelivestockauctions.com.au using your desktop, laptop, iPad, iPhone or android device
- 2 Click on the "Sign Up" page / link
- 3 Create a bidding profile using the bidder registration page.
(You can either register as a livestock agent, company or private buyer.)
- 4 Agree to the Elite livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue
- 5 Click "Register"
- 6 You will then be notified by email that an account has been created

- 7 Once an account has been created you are all "Set to Bid"
- 8 Each auction can then be viewed by clicking "Live Auction" logo on the Elite Livestock Auctions website
- 9 Once you receive email notification that your account has been created please go to the sale you wish to bid at and click "Request to Bid"
- 10 The sale agents will then approve your application to bid and on the sale catalogue you will see "✓ Bid Request Approved"
- 11 On Sale day simply login, click "Enter Auction" on the catalogue page and you can start bidding.
(There is no need for software download)
- 12 At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

Having trouble registering and logging in?

SALE INFO

12:00pm March 30th Inspection of sale lots

11:00am March 31st Auction starts online via Elite Livestock Auctions

CONDITIONS OF SALE

The sale will be conducted under the ALPA Conditions of Sale as applied by GDL and is printed in the back of this catalogue. The following are Special Conditions applied by the Australian Wagyu Association (AWA) to generate a high level of quality assurance.

Mayura Wagyu Stud offer lots under the following conditions:

1. All live Lots and sires are AWA registered as Fullbloods or Purebred Polled
2. BREEDPLAN: Data published in the sale catalogue is current at the time of printing. Latest data is in the online catalogue.
3. SEMEN: Bidding is PER STRAW.
4. BREEDING SOUNDNESS & GUARANTEES OF FERTILITY: All bulls offered for sale have passed a semen fertility test by a registered veterinary surgeon and a semen evaluation certificate will be available.

Guarantees of fertility

BULLS: All bulls are guaranteed breeders and to so prove within six months of the date of sale or by reaching the age of 24 months whichever date shall be later.

FEMALES: All females are guaranteed to go in calf within six months of the date of sale or by the age of 30 months whichever date shall be later. A positive pregnancy test certified by a qualified veterinary surgeon shall be sufficient evidence that the animal is in calf.

CLAIMS: Claims under the above guarantees of fertility must be made to the vendor within six months from the date of sale and prior to the animal entering a quarantine area other than on the vendor's property.

- > Claims must be accompanied by a veterinary certificate which must clearly identify the basis of the claim.
- > Infertility resulting from injury or disease occurring after the sale of the animal will not be covered by this guarantee.

> The vendor retains the right to have the animal placed on a property nominated by the vendor or returned to the vendor's property for further assessment of fertility for a period not exceeding six months. In the event of the animal being proven fertile within the period, the costs incurred shall be borne by the purchaser. In the event of the animal not being proven fertile within the period the costs incurred shall be borne by the vendor.

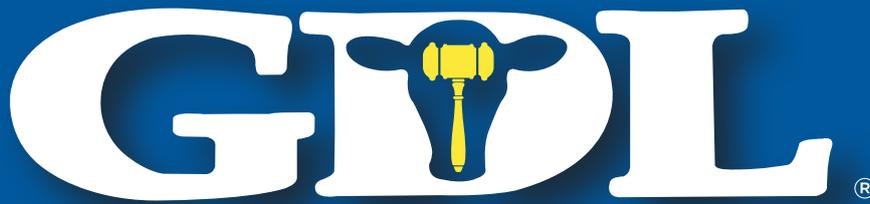

LIABILITY OF A VENDOR: Except for costs defined elsewhere in the conditions of sale, the liability of a vendor in respect to claims relating to fertility shall not exceed the purchase price of the animal(s) or provide mutually agreed upon replacement animals.

REFUNDS: In the event of a claim being substantiated and the purchase price being refunded, the animal(s) shall automatically become the property of the vendor and be returned to the vendor or be disposed of according to vendor instructions at vendor's expense.

This guarantee is voided automatically if the animal is returned to the vendor in poor physical condition or with any injury as determined in the sole discretion of the vendor acting reasonably, or if tests carried out on behalf of the vendor within 14 days of return proved positive to any diseases which may affect the animals fertility or ability to breed naturally, or the purchaser admits that it has or the vendor forms the view acting reasonably that the purchaser has collected and stored semen from a bull or has performed super ovulation or flushed a female.

In the event of a dispute as to whether a lot is a breeder, such dispute shall be resolved by the vendor and the purchaser and the auctioneer. While the auctioneer will use their best endeavours to assist, shall have no liability or responsibility in that regard. In the event that a lot is alleged or proved to be a breeder the purchaser shall nevertheless be obliged to pay the auctioneer the full price and any other monies or interest payable by the purchaser in accordance with these terms and conditions.

- 5. PRE-SALE INSPECTIONS:** Live animals will be at the Sale venue. Photographs are in the catalogue and in the online catalogue. The Lots are located on the vendor's property and genetics are in storage as disclosed in the catalogue. Pre-sale physical inspections may be arranged directly with the vendor: Scott de Bruin on 0408 899 011.
- 6. GENETIC CONDITIONS:** Results of DNA testing for specific genetic conditions appear in this catalogue which indicate the lots status and whether it is DNA tested free or 'free by pedigree' of B3, CHS, CL16, and F11.
- 7. BIDDING:** the sale will be a live auction with an online interface through Elite Livestock Auctions allowing appropriately registered potential buyers worldwide to bid. Potential online buyers from Australia should register with elitelivestockauctions.com.au. Special arrangements must be made by International Bidders with GDL who will provide a temporary Buyer password for this sale only.
- 8. INSURANCE:** ownership of a Lot changes to the Buyer at the fall of the hammer. Insurance is recommended and will be available at the sale.
- 9. EXPORT PROTOCOL:** availability of Lots to International countries is indicated and those buyers should check with authorities to ensure access to their purchases. Contact vendor/agent for latest eligibility for various countries. Check online for latest update.
- 10. TRANSFERS:** Mayura will transfer the ownership of live Lots to the new owners at no cost to the Buyer.
- 11. FREIGHT and DELIVERY AFTER SALE:** All live animals are at the vendor's property. Genetic material is stored at registered premises as indicated in the catalogue. Freight is the Buyers' responsibility to arrange and pay for. The contacts of the vendor and semen storage centres are as indicated in the catalogue. Delivery will not be approved until the Buyer has paid in full.
- 12. GST:** The sale will be conducted on a GST exclusive basis and GST of 10% will be added to the sale price on the invoice.
- 13. RISK & LIABILITY RELEASE:**
- > Any person visiting Mayura Station does so at his/her own risk.
 - > All visitors release the vendors and agents from all actions or demands due do any loss, death, damage or injury occurring on the premises.
 - > The vendors or agents are not responsible and have no liability for any death or injury to any person or any loss of or damage to visitors, their property or otherwise.
- 14. HOW TO BID:** Registered bidders can bid online through elitelivestockauctions.com.au or by telephone via a nominated agent/ third party approved by the Agents.
- 15. BIDDING VARIATIONS (PER LOT or PER ITEM):**
Lots will be offered for sale in the following manner:
- > Live cattle - bidding is per Lot
 - > Semen - bidding is per straw
- 16. EMBRYOS:** Bidding is per embryo.
- 17. HEALTH STATUS & TREATMENTS:** Mayura have completed a Vendor Declaration form and this form is available for perusal on www.mayurastation.com

EBVs

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These are called Estimated Breeding Values (EBVs). The EBV is, therefore, the best estimate of an animal's genetic merit for that trait. EBVs are expressed as the difference between an individual animal's genetics and the genetic base to which the animal is compared.

ACCURACY

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

- Less than 50% = Low accuracy and should be considered a preliminary estimate. The EBV could change substantially as more performance information becomes available.
- 50 – 74% = Medium accuracy, usually based on the animal's own records and pedigree.
- 75 – 90% = Medium-high accuracy and usually includes some progeny information. Becoming a more reliable indicator of the animal's value as a parent.
- 90% and above = High accuracy.

BIRTH

GL: Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to lighter birth weights and easier calving.

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers calving at 2 years of age.

GROWTH

200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-Day weight of their calves.

200: 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days, and dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600: 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600

days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

FERTILITY

SS: Scrotal Size EBV (cm) is an indicator of male fertility in regard to semen quality and quantity in Western cattle breeds. Higher (positive) EBVs indicate higher fertility. There is also a favourable genetic relationship with age of puberty in female progeny. The relationship between scrotal size and fertility in Wagyu is assumed, but not proven.

CARCASE

Carcase Weight EBV (kg) is based on abattoir carcass records and live weight measurements (particularly at 600-Day weight) and is an indicator of the genetic differences in carcass weight at the industry average slaughter age of 990 days. Larger positive values are more favourable.

EMA: The EMA EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 420kg dressed carcass. More positive EBVs indicates larger eye muscle area and higher retail beef yields. Ultrasound, Aus-Meat and Japanese Digital Image Camera measurements contribute to this EBV.

Rump Fat: The Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 420kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV: The Retail Beef Yield Percent EBV (%) estimates the genetic differences in total (boned out) meat yield as a percentage of a 420kg dressed carcass. A more positive EBV indicates higher percentage yield for the 420kg carcass weight.

Marble Score EBV: The Aus-Meat Marble Score is an estimate of the genetic difference in the Marble Score in a 420kg carcass. Marble Score EBVs utilise the Aus-Meat Marble Score scale of 1 to 10, where 10 is equivalent to 9+. Where results from the Japanese Digital Image Camera are available, marbling percentage and fineness are also used to calculate Marble Score EBVs. Larger positive values are more favourable.

Marble Fineness EBV: (Marbling Fineness Index) estimates the genetic differences in the Marbling Fineness Index (degree of fleck of marbling fat) as measured by the Japanese Digital Image Camera. A more positive EBV indicates higher levels of marbling fineness.

NOTES: Itoshigenami JNR is the ultimate proven carcass sire. He is the most profitable carcass sire used in the Mayura branded beef operation. His carcasses consistently grade well in excess of Ausmeat 9+ with herd leading eye muscle area and carcass weight at a very young age. His carcass EBV's speak volumes and are enhanced by their accuracy. With over 925 Carcasses independently assessed through breedplan and backed up with MIJ objective digital assessment, he is arguable the most proven bull of ANY beef breed. JNR semen from the 2020 sale has been used very successfully in IVF breeding with over 68 pregnancies produced from a single straw.

Semen is export qualified and sold per straw – Available, USA, Canada, South Africa and the EU

This will be the only release of Itoshigenami JNR Semen for the next 12 months.

Buyer of Lot 1 has the option of purchasing Lot 2 at the same price.

 BENFV2058 BENLEE HIKOHIME V2058

NOTES: If JNR is the carcass king, Notorious is the prince and heir apparent. He is the resulting progeny of our two highest performing animals at Mayura. Sired by breed leader JNR and born from Dam WGWFD8223 our most profitable cow. She has produced 4 carcasses, utilising MJJ technology Ave MS 11, EMA 110.25, HSCW 449.375kg, Ave 302 DOF Notorious was an early maturing bull with standout growth and frame at a young age. Notorious is a unique package capable of increasing size and marbling in his progeny. Notorious's first carcasses have been exceptional in quality. Marbling levels have been so extreme, with a high degree of fineness that he is now ranked no 1 for marbling in the Mayura program, most impressively the rib eye area has been the biggest on average we have seen. Bigger loin's lead to hugely profitable carcasses.
This bull is very exciting! Semen eligible for export to the USA, sold per straw.
 Sadly Notorious passed away from injury in November 2021. Buyer has the option of purchasing the next lot at the same price.

 JKCP471 ISLAND WAGYU JKCP471

NOTES: Heterozygous polled. Direct daughter of Kanadagene 100 out of a 52Y female. Marble. Growth. Ribeye area. 52Y is averaging 1 marble score higher, 20kg heavier, and 10cm larger ribeye areas over Kanadagene 100 females (18 total carcasses), than the average of his progeny (over 1500 carcasses). A lot of people talk about finding genetics that click. This seems to be one of those combinations. Poll Wagyu have put 6 years of very selective breeding and kill data analysis into their joint venture. This is a very rare opportunity to buy a Poll Wagyu female that will put the buyer years ahead in breeding Polled Wagyu animals. Breed her to polled genetics and have the opportunity for homozygous, or breed her to the best fullblood genetics and continue lines of outcross polls. Open and ready to breed, flush or IVF.

NOTES: Heterozygous polled, phenotypically scurred. Direct son of 52Y out of JNR daughter. 52Y is the most profitable bull in the Hammonds Robbins Island operation. He has the unique attribute of holding marbling while increasing carcass weight and EMA. The maternal sire, JNR is the most proven carcass sire in Wagyu breedplan and is the most consistently profitable bull in the Mayura program over the last decade. The combination of growth and carcass power makes this bull an excellent opportunity. The combination of Hammond and Mayura performance breeding provide a unique opportunity to start your Poll Wagyu program.

NOTES: The tank! Incredibly powerful bull, packed with growth and maternal traits. R0152 was purpose bred to join over our high marbling females as an outcross to produce quality females for Mayura Station. Weighing in at 858kgs at 22mths of age. R0152 is an impressive animal in any breed. A unique genetic package, sired by Toshiro 1/3 who's sire Kikuhana produces excellent females, his maternal sire Kitaguni 7-8 is one of the greatest bulls of all time in Japan and is still one of the most used bulls in Japan to produce feeder cattle. On the dam side L0914 is sired by proven carcass leader JNR and is from the Kinu cow line. Grand Dam J0175 has produced 3 carcasses at an Ave of 9.4 (MIJ), EMA 90cm (10/11), HSCW 408kg, 27mths, 275 DOF. Mayura will retain 5,000 straws to use in its own breeding program. Buyer has full marketing rights on the bull.

 WGWFD8225 WAGYU GENETICS CHIYOTAKE D8225

NOTES: R2161 has great capacity and length, she is wide across her backline and pelvis, with the highest Milk EBV in the catalogue. A very balanced pedigree with high performance across her EBV's. Sired by Toshiro 1/3 who's sire Kikuhana produces excellent females, his maternal sire Kitaguni 7-8 is one of the greatest bulls of all time in Japan and is still one of the most used bulls in Japan to produce feeder cattle. On the dam side JNR and Shigeshigetani provide excellent carcass performance. Her grand dam L0032 has produced 1 carcass analysed by MIJ30, MS 10.1, EMA 80cm (10/11) HSCW 424kg, 27mths, 270 DOF.

LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE

CHAPTER ONE - PRELIMINARY

1. (a) A vendor is bound by these terms and conditions by offering livestock for sale by auction.
- (b) An agent (which includes an auctioneer) is bound by these terms and conditions by conducting an auction sale.
- (c) A buyer is bound by these terms and conditions by bidding at auction.
- (d) **Competition and Consumer Act (Cth) 2010**
It is unlawful for parties that are, or otherwise would be, in competition with each other to make, or give effect to, a contract, arrangement or understanding that contains a provision relating to:
 - i. price-fixing or restricting outputs in the production and supply chain; or
 - ii. allocating customers, suppliers or territories; or
 - iii. bid-rigging; or
 - iv. collusive bidding.

Large fines and other sanctions may be imposed for unlawful conduct.

2. (a) In these terms the expression auctioneer, agent, buyer and vendor respectively includes the servants, contractors and agents of each of them. The auctioneer, agent, buyer and vendor shall be wholly responsible for the acts and omissions of their respective servants, contractors and agents. The term "auctioneer" includes, so far as the law and context permits, the vendor's agent.
- (b) When used in these terms the expressions "companion animals" means all animals originating from the same property on a particular day. Where lots are split and sent to multiple establishments, then all of these animals shall be regarded as companions.
3. The following applies in interpreting these terms and conditions:
 - (a) The following words have the following meanings:
Fees means all levies, charges, fees, costs and other expenses incurred or relating to these terms and conditions and the sale and purchase of livestock including, without limitation, transaction levies, yard and weigh dues, cartage, advertising and rebates, and whether paid for, or incurred, by the agent.
Livestock means animals auctioned pursuant to these terms and conditions; and
Price means the amount at which the lot has been sold to the buyer referred to in clause 7 of these terms and conditions
 - (i) plus any Fees and other expenses incurred in relation to the purchase of livestock that are payable by the buyer; and
 - (ii) plus any GST added in accordance with clause 12.
 - (b) These terms and conditions are subject to legislation or regulation in the State in which the auction is conducted and in the event of any conflict then the legislation or regulation will prevail. The provisions of these terms and conditions are in addition to, and do not derogate from, the duties and rights of vendors, agents and buyers set out in legislation and regulation in the State in which the auction is conducted.

CHAPTER TWO - STANDARD TERMS OF SALE

4. Subject to any reserve price, and to the right, prior to the fall of the hammer, of the vendor to withdraw any lot without declaring the reserve, the highest bidder shall be the buyer.
5. The auctioneer has the right to bid on behalf of the vendor provided that right is notified prior to the commencement of the sale and is subject to State law.
6. A bid cannot be made or accepted after the fall of the hammer unless, in accordance with clause 8, the auctioneer decides to put the lot up again.
7. Prior to the fall of the hammer the auctioneer shall announce the last bid and receive any further bids. The last price called by the auctioneer at the fall of the hammer shall be the amount at which the lot has been sold.
8. In the event of a disputed bid, the auctioneer is the sole arbitrator of the successful bidder or the auctioneer may decide to put the lot up again. The auctioneer's decision is final.
9. The auctioneer may refuse to accept any bid which, in the auctioneer's opinion, is not in the best interest of the vendor and need not give reasons for doing so.
10. A bidder shall be deemed to be a principal unless, prior to bidding, the bidder has given to the auctioneer a copy of written authority to bid for or on behalf of another person.
11. The successful bidder at a livestock auction sale must give to the auctioneer at the fall of the hammer:
 - (a) the purchaser's name; or
 - (b) the bid card number which identifies the purchaser; or
 - (c) the name of the person on whose behalf the successful bid was made; and
 - (d) the Property Identification Code (known as the "PIC") of destination.
12. The auction shall be conducted on the basis that the bid price shall be exclusive of Goods and Services Tax (GST). GST shall be added after the fall of the hammer for those sales subject to GST.
13. The vendor warrants:
 - (a) That the vendor has (or will have) the right to sell the livestock at the time of delivery; and
 - (b) That the purchaser will obtain title on completion of the purchaser's obligations under this contract including payment.
14. If a buyer does not comply with any of these terms and conditions, which include the requirements of State law, any livestock knocked down to that buyer may be re-sold by public auction or private contract in whatever lots and manner the auctioneer decides. The re-sale may be with or without notice and shall be at the buyer's risk. The buyer is responsible for all loss and expense arising out of a re-sale and is not entitled to any resulting profit.
15. The buyer of livestock must pay the agent the full amount of the purchase price in immediate funds on receipt of a tax invoice. Payment is required prior to delivery unless some other time for payment is specified in an agreement between the buyer and the auctioneer that was made before the fall of the hammer. If, before delivery, payment has not been made then clauses 20 to 23 apply.
16. No person may bid unless, prior to the commencement of the sale, that person has made arrangements satisfactory to the auctioneer for payment for livestock purchased. If bids in breach of this condition are inadvertently accepted, delivery shall not be given until the purchase money is paid and any law, rule or practice to the contrary is accordingly negated as far as possible.
17. (a) Cattle sold on a liveweight basis that are weighed pre-sale are at the risk and expense of the buyer upon the fall of the hammer.
- (b) Cattle sold on a liveweight basis that are weighed post-sale are at the risk and expense of the buyer immediately after weighing.
- (c) All livestock other than cattle sold on a liveweight basis are at the risk and expense of the buyer upon the fall of the hammer.
18. (a) Subject to this clause the sale is complete on the fall of the hammer.
- (b) The time for rejection is the time commencing at the fall of the hammer and ending at the first of:
 - (i) delivery is taken by a representative of the buyer;
 - (ii) departure of the animal from the purchaser's delivery pen; or
 - (iii) one hour after the last listing:
 - a. in the case of pre-sale weighing, sold; or
 - b. in the case of post-sale weighing, weighed.
- (c) During the time for rejection the buyer may reject any animal which is lame, blind or diseased where that condition existed prior to the fall of the hammer but could not be reasonably observed when the animal was in the selling pen.
- (d) If the purchaser rejects an animal during the time for rejection then the sale of that animal is cancelled and the animal is returned to the vendor or sold on such terms as any buyer and the agent may agree, after the agent has disclosed the reason for rejection to that buyer.
- (e) This subclause applies only to cattle which are sold in Queensland at auction for slaughter. The agent has responsibility for the prevention of loss or escape (but not death, sickness or injury) of those cattle from the time of the fall of the hammer, for delivery to and from the scales, to the buyer's delivery pen and onto the buyer's nominated transport. This responsibility ends at the earlier of those cattle boarding the buyer's nominated transport or sunset on the day after the sale. This

subclause does not apply if the agent makes an announcement to that effect prior to the commencement of the sale.

19. (a) Subject to the right of rejection in Clause 18, all conditions and warranties expressed or implied by law are hereby excluded from the sale to the extent that the law allows. All lots are open for inspection prior to the commencement of the sale and are sold with all faults, if any. No compensation shall be given for any faults, imperfections, errors of description, number in or of any lots sold or otherwise.
- (b) Any claim or objection arising out of an error or misdescription in the provision of relevant information in terms of legislation or regulation concerning the National Livestock Identification Scheme (NLIS) must be made by 5:00pm on the seventh day after the fall of the hammer. No objection, requisition or claim against the vendor or agent in respect of such error or misdescription can be made after that time.
- (c) Any statements made by the vendor or the auctioneer whether in writing or orally to the effect that any female has been pregnancy tested or scanned positive shall mean and require only that a certificate in writing shall be supplied to the buyer signed by a qualified veterinary surgeon or certified scanner certifying that the said female has been tested or scanned on the date specified in the certificate and that in the opinion of the surgeon or scanner was pregnant on that date.
- (d) For slaughter cattle, the agent undertakes to make every reasonable effort to ensure that any NLIS cattle device number is transferred from the saleyard PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.
- (e) For other slaughter livestock the agent undertakes to make every reasonable effort to transfer the NLIS information transferred from the saleyard PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.
- (f) Where livestock have a food safety or market eligibility status derived from the National Vendor Declaration (NVD) and/or the NLIS/ERP database, the agent will inform the buyers by pre-sale catalogue and/or announce the status prior to the offering of those lots.
20. If delivery is made to, or possession obtained by, the buyer or its representative before full payment of the Price, then until full payment is received, the buyer:
 - (a) does not acquire title to the livestock;
 - (b) holds the livestock as bailee only for the vendor;
 - (c) must act in a fiduciary capacity in its relationship with the vendor;
 - (d) must store the stock separately or so that they are readily distinguishable from other livestock owned by the buyer;
 - (e) is responsible for the safety and well being of the livestock;
 - (f) may make a bona fide sale for market value of any or all of the livestock. As between the buyer and the subsequent buyer, the sale shall be made by the buyer in its own name and not as agent for the vendor, however as between the vendor and buyer, the sale shall be made as bailee and agent for the vendor; and
 - (g) must keep and account for the proceeds of any subsequent sale separately from its other money and hold those proceeds, together with the benefits of any rights against subsequent buyers, on trust for the vendor.
21. The purchaser agrees that:
 - (a) Clause 20 creates a registrable security interest under the Personal Property Securities Act (Cth) 2009 (PPSA);
 - (b) the Purchaser acknowledges the rights of the Seller (and/or the Agent if Clause 23 applies) to register that security interest under the PPSA with respect to the security interest created by this clause;
 - (c) the Livestock are collateral for the purposes of the PPSA;
 - (d) to the extent permitted, the Purchaser waives any right the Purchaser has under the PPSA to receive notices; and
 - (e) the date upon which the security interest created by this clause comes into force is the first date on which livestock are delivered pursuant to this contract.
22. The buyer may not make any claim against the vendor for actions by the vendor or its agent under clauses 20 or 21 and indemnifies the vendor and its agent against any loss, damage, costs, expenses, penalties, fines or claims suffered by the vendor or its agent in respect of or arising from the vendor exercising its rights under clauses 20 or 21.
23. Clause 23 applies whenever the agent pays the vendor before being paid by the buyer, which the agent is not bound to do. The agent is then the de facto agent of the vendor at law.
- 23.2. The vendor hereby gives notice to the buyer of the assignments referred to in clause 23.3.
- 23.3. When this clause applies, in addition to any rights of the agent that arise by operation of the law, the parties agree that, subject to clause 23.5 the agent is subrogated to all rights of the vendor under these terms and conditions against the buyer.
- 23.4. The vendor acknowledges that the agent may take enforcement, repossession or other action to recover any livestock for which the buyer has not paid in full, or the Price of such livestock, owing by the buyer under these terms and conditions:
 - (a) when this clause does not apply, as agent of the vendor (including by reselling the livestock); and
 - (b) when this clause applies, on the agent's own behalf exercising the rights of the vendor by subrogation or assignment under these terms and conditions (whether in the vendor's name or not) and, where title to the livestock has not passed to the agent, by selling the livestock as agent of the vendor without the agent having to account to the vendor for the proceeds of sale.
- 23.5. The agent may at any time, assign, transfer, securitise or otherwise dispose of all or any of its rights under these terms and conditions and any debts created pursuant to it (including, without limitation, the rights assigned to it under clause 23.3).
- 23.6. The vendor hereby irrevocably appoints the agent as the vendor's attorney to:
 - (a) do at any time and in any manner as the agent thinks fit all acts necessary or desirable to perfect or improve the rights and interests affected, or intended to be afforded, to the agent under these terms and conditions; and
 - (b) appoint one or more sub-attorneys to do anything that the agent may do as the vendor's attorney.
- 23.7. These terms and conditions do not render the agent liable to the buyer as vendor nor entitle the buyer to set off against the agent any right the buyer may have against the vendor or otherwise.
- 23.8. The buyer acknowledges that the provisions of this clause 23 are intended solely for the benefit of the agent (and its assigns) and the vendor. The liabilities and obligations of the buyer will not be in any way affected:
 - (a) by this clause 23, other than as it expressly provides; or
 - (b) by the failure of the agent or the vendor or either of them to comply with the terms of this clause 23.
- 23.9. The buyer must pay all amounts payable to the vendor or the agent under these terms and conditions without any deduction, withholding, set off or counterclaim whatsoever, whether the benefit of a deduction, withholding, set off or counterclaim is alleged to exist in favour of the buyer as against the vendor or the agent in any capacity whatsoever or any other person including any assignor of the vendor's or the buyer's interests under these terms and conditions.
24. (a) The agent agrees that he is liable to pay to the vendor the Price, less such commission as is agreed between the vendor and the agent, and in the absence of any agreement such amount as is reasonable, and less the Fees that are payable by the vendor that were incurred by the agent on behalf of the vendor in relation to the sale of the livestock.
- (b) In the event that the buyer pays the Price or part of it direct to the vendor then the agent has no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the same livestock, then the agent shall be deemed to have paid that amount and the agent may debit that amount to an account held in the name of the vendor by the agent.
- (c) Regardless of whether or not a sale has occurred the agent may, but is not under obligation so to do, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent.
25. (a) The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of

engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation to the safety or otherwise of the sale ring, the saleyards and the surrounding environments.

- (b) The vendor, the agent and the buyer agree to comply with their several duties under the Australian Animal Welfare Standards and Guidelines for the Land Transport of Livestock and further to consign, manage, receive, transport and handle livestock in accordance with any other or additional requirements of animal welfare legislation specific to the jurisdiction in which livestock are consigned, managed, received, transported and handled in the course of the auction process.

CHAPTER THREE - VENDOR WARRANTY FOR CORRECT PRESENTATION AND DECLARATION

26. This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the livestock are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.
27. The warranty of a vendor is that livestock and their companion animals offered for sale at auction:
 - (a) pass government and other regulatory authority requirements and inspections at the time of slaughter;
 - (b) are of merchantable quality;
 - (c) carry an NLIS device in accordance with State law;
 - (d) in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in any document, the livestock will have those characteristics or will be fit for the particular purpose or market; and
 - (e) all information in any document provided by the vendor is true, complete and correct in all material respects.
28. In the event of a breach by the vendor of the vendor's warranty and provided such breach is notified by the buyer to the agent by 5:00pm on the 7th day after the fall of the hammer then the buyer is not liable to pay the portion of the Price of such of the vendor's livestock to which the breach applies.
29. However if the breach by the vendor is such that the livestock are not rejected outright but are instead downgraded then the buyer will pay the value of the livestock at their next highest and best use.
30. In the case of a breach by the vendor of the vendor's warranty then the vendor will also be liable to the buyer for any further losses which the buyer might establish but the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effect of the breach and the amount of any loss.
31. Where a sentinel animal of a lot tests positive for chemical residue, or foreign material contamination and provided such test is certified and notified as required by these vendor warranty terms, then:
 - (a) the buyer will be entitled to delay payment for the price of all livestock in that lot only; or
 - (b) the vendor has the option, at the vendor's cost, of collecting the companion animals, if allowed by law; or of having the livestock slaughtered in which event the risk of further condemnations will be that of the vendor. Where product integrity is potentially jeopardised the Processor has the right to refuse slaughter and send the livestock back to the consigning property at the vendor's cost.
32. The auctioneer is liable to the buyer in respect of any breach of the vendor's warranty arising out of:
 - (a) any error, by the auctioneer, of transcription of information from the NVD completed by the vendor to the pre-sale catalogue or the buyers post-sale summary;
 - (b) any failure by the auctioneer to notify the buyer, prior to bidding, of any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and
 - (c) any failure by the auctioneer to announce prior to bidding, or disclose in the pre-sale catalogue, that the vendor has failed to provide a NVD that is complete in all material aspects.

CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE

33. This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the cattle are transported direct from the sale yard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells cattle to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.
34. Owners risk reflects the producer's responsibility to provide slaughter cattle for sale that are fit for human consumption. Cattle are fit for human consumption if they are not condemned as unfit for government. Owners risk applies if the condemnation is due to a condition in the animal which the buyer establishes, by the relevant government certificate, existed prior to the fall of the hammer.
35. A buyer with the benefit of owners risk protection is not liable to pay the Price of such livestock to the vendor. The buyer remains nevertheless liable for all costs incurred after the fall of the hammer in transport, slaughter, testing and disposal of the animal.
36. Owners risk protection is available to the buyer of cattle to which this chapter applies if all of the following are satisfied:
 - (a) a certificate is issued by government which states the relevant NLIS RFID tag number and PIC, the date of the certificate, the reason for condemnation and that the reason for condemnation existed prior to the fall of the hammer;
 - (b) the certificate is received by the selling agent either in its original form or by fax or electronic communication in the form of data, text or imaging by 5:00pm on the 7th day after the fall of the hammer; and
 - (c) if the condemnation is due to chemical residue the certificate follows testing in a government approved laboratory which establishes maximum residue limits in excess of the Australian limit.
37. Owners risk does not apply, and the buyer must pay for the cattle, if the reason for condemnation is any of bruising, fever, partial condemnation or emaciation.

CHAPTER FIVE - NOTICES REQUIRED BY LEGISLATION

- NSW Property, Stock and Business Agents Act 2002 Warnings**
Penalties for collusive practices. It is an offence against the Property, Stock and Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:
- (i) to abstain from bidding; or
 - (ii) to bid to a limited extent only; or
 - (iii) to do any other act that might prevent free and open competition.
- Severe penalties may be imposed on persons convicted of collusive practices.

The auctioneer has the right to make one bid on behalf of the vendor if the auctioneer clearly and precisely announces that fact prior to the sale.

Insolvency Legislation. An auctioneer conducting a public auction must not appear to acknowledge the making of a bid if no bid was made. A person must not participate in collusive practices by way of making or receiving an unlawful promise to abstain from bidding, not to bid except to a limited extent or do any other thing which may prevent free and open competition.

WA Auction Sales Act 1973 s31 NOTICE

- It is an offence to:
- (i) induce or attempt to induce another person to abstain from bidding by means of a promise, expressed or implied, that the other person will have the right to elect to take over as buyer or to toss or draw lots to establish who is to become the owner;
 - (ii) abstain or agree to abstain from bidding as a result of such a promise;
 - (iii) knowingly enter or permit or cause to be entered in the auctioneer's record any name other than that of the actual successful bidder;
 - (iv) enter in the auctioneer's record the name of the buyer other than that of the actual successful bidder; or
 - (v) in the case of successful bidder supply wrong information as to the name of the buyer to the auctioneer or to any person, firm or corporation on whose behalf the sale is conducted.
- The vendor, or any person on behalf of the vendor, or the auctioneer have the right to make no more than three bids.
